NAME
nop − pretty-print graph file

SYNOPSIS
nop [**−p?**] [*files*]

DESCRIPTION
nop reads a stream of graphs and prints each in pretty-printed (canonical) format on stdout. If no *files* are given, it reads from stdin.

OPTIONS
The following options are supported:

−p   Produce no output - just check the input for valid DOT.

−?   Print usage information.

EXIT STATUS
If any errors occurred while processing any input, such as a file not found or a file containing illegal DOT, a non-zero exit value is returned. Otherwise, zero is returned.
